Since the States Government began, 9 yeares, 30 Iune.

Since the Lord Protector began his Government 7 yeers, 16. December.

A generall Description of the foure parts of the Yeare; and first, of the *Spring*.

The Spring beginneth with the Suns ingresse into the first minute of the Equinoctiall Signe Aries, which happeneth with us upon Sunday the 20 of March, 23 min. past 1. in the afternoon; and continueth the Suns curtion through Aries, Taurus, and Gemini, and causeth equall day and night to the Inhabitants of the whole Earth. Now he taketh his leave of the Southern, and beginneth to send forth his comfortable influence to the Northern part of the world.

Of Summer.

This Quarter beginneth with the Suns entrance into the first scruple of the Tropicall Sign Cancer, being this year upon Tewsday the eleventh day of June, 3. minutes past five in the afternoon, and continueth the Suns iturration through Cancer, Leo and Virgo. At this time the Sun maketh his nearest approach to our Zenith, having the greatest North declination from the Equinoctiall, thereby causing the longest day and shortest night in the Northern Hemisphere. About this time the Sun is in his Apogeon, or point farthest distance from the Earth.

This Quarter beginneth with us on Fryday, the 13. of September; 50. minutes past 7. in the forenoon; at what time the Sun passeth into the Equinoctiall Signe Libra, thereby to equalize the dayes and nights throughout the whole world, being once more bifrontall, and equally radiating to the Artick and Antartick Poles; and continueth his perambulation through Libra, Scorpio, and Sagittarius.

Of Winter.

This Quarter takes beginning at the Suns ingresse into the first scruple of the tropicall Signe Capricorn; which happeneth this yeare on Fryday, the 11. day of December, 18. minutes past seven in the afternoon; and continueth the Suns progresse through Capricornus, Aquarius, and Pisces; being now in his greatest distance from our Zenith, and obliquity from the Equinoctiall, causing the shortest day and longest night to the Northern Hemisphere.

Of the Eclipses.

There will happen four Eclipses this Yeare, but we in England shall see but only two of the most.

The first Eclipse, is of the Sun, upon Monday, the first of June, but not visible to us, because it will happen neer 10. of the Clock at night.

The second Eclipse is of the Moon upon Monday the 15. day of June.

The beginning at 6 h. 40 m.
The middle at 8 h. 26 m.
The end at 10 h. 11 m.

The Eclipse will be visible to us before the middle of it.

The third Eclipse is of the Sun the 25. of November about 7. in the morn. therof not visible in England.

The 4th. eclipse is of the Moon on Thurs. 10. Decemb.

The beginning at 5. h. 42 m.
The middle at 6. h. 50 m.
The end at 7. h. 58 m.

This Eclipse may be seen with us from the beginning to the end.

October.

SOwe Wheat and Rye, the sooner the better, for fear of raine: set Acorns and Nuts, gather Winter fruit, the weather dry, in the afternoon, and in the wane of the Moone. Cut Rose-trees, if you desire to have store of Roses, doe this once in two yeares: refuse not any needfull physick at the hands of the learned: and use all moderate sports, to revive the vitall spirits to the service of God onely.

November.

MAke Mault; kill Hogs; trench Gardens with dung; set Crab-tree stocks; sowe Wheat and Rye in exceeding hot sandie grounds; cut downe Timber for Ploughs, Carts, and other implements for husbandry: use wholsome meat and drink, with good exercise to preserve health.

December.

IN this and the next moneth, cut downe Timber in the last quarter of the Moone; uncover the roots of fruit-trees; set Beanes and Pease; cover all your best flowers and hearbs from frosts and storms, with old rotten horse-dung; Looke well to your Cattell; water and keepe moyst your medowes; let horses blood: And to conclude, drinke good Wine and strong drinke, keepe thy body warme clad, thy house warm and dry, banish all cares from thy heart, and feast thy poore neighbours, rejoycing, that God sent his onely begotten Son, about this time, into the world, to save all such that lay hold on him with a true and lively faith.
